

## Phasing of Building project.

At the time of this post the “phasing” of the building project would be as follows:

1. The new classrooms and multi-purpose/cafeteria would be built first and would not affect the students’ daily activities. The students would continue classes in the current classrooms until the new classrooms are finished.
2. Once the classrooms and multi-purpose/cafeteria are finished, we will move students into the new classrooms and begin demolition of the current High School/Junior High. That will be followed by constructing the administration wing of the building that will connect the classrooms to the multipurpose/cafeteria, gym, and shop.

This plan allows for very little disruption to students everyday lives and routines. As with any construction project there will be some disruption, but this plan allows for as little as possible.
